**Assignment 1: Ensure the script checks if a specific file (e.g., myfile.txt) exists in the current directory. If it exists, print "File exists", otherwise print "File not found".**

<u>Solution:</u>

```
  GNU nano 6.2                          file.sh
#!/bin/sh

filename="for.sh"

if[ -f"$filename" ]
  then
echo "file exists"
else
echo "file not found"
fi
```
